

# Mountain Dat@ Drone

MDD offers a set of industrial automated multi-sensor, multi-tool and multi-mission industrial drones paired with new generations of connected object for the protection of people and the environment. A full range of services to meet the specific needs of our territories.

**Innovative R&D developments in different fields: the next generation of automated drones and their management systems, digitalisation of mountain and IoT solutions, new equipment for field survey acquisition and digitisation, the creation of lines of excellence in relief and security, ecosystem modelling and assessment and policy support.**

## OUR CONTRIBUTION

Saireniti platform integrator and lead developer (digital platform for the exploitation of data from aircraft and sensors). We are the constructor of the data warehouse, guaranteeing its security and regulatory compliance (GDPR in particular).
