

MY HEALTH MY DATA

”

THE FIRST OPEN BIOMEDICAL INFORMATION NETWORK CENTRED ON THE CONNECTION BETWEEN ORGANISATIONS AND INDIVIDUALS.

In **MHMD**, **Data Controllers** and **Data Consumers** are connected through a **private blockchain network**, which is responsible for **keeping the tracking of the data life cycle** and **orchestrating the secure data sharing process**.

Who provided this blockchain ? **Us !**

ProRegister recognised by the
Innovation Radar

The Consortium adopted our blockchain solution : **ProRegister**. Based on Hyperledger Fabric, which ensures **high transaction rates**, **low network latency** and **low energy demands** while providing a **flexible**, **modular** and **secure** architecture with a **pluggable consensus mechanism**.

To know what is the blockchain used for ? How does the MHMD blockchain achieve compliance with the GDPR ?
